```java
private static String getSelectedLauncherProfile(File minecraftDir) {
        File path = new File(minecraftDir, "launcher_profiles.json");
        JsonObject json = JsonUtils.parseJson(path);

        if (json != null) {
            JsonElement element = json.get("selectedProfile");

            if (element != null && element.isJsonPrimitive()) {
                return element.getAsString();
            }
        }

        return null;
    }
```
